

# Vehicle mobile checksheet

## Real-time paperless vehicle inspections

- ✓ Elimination of paper-based checksheets and associated manual recording/filing processes.
- ✓ Instant visibility of missed inspections.
- ✓ Automated mileage collection for accurate onward management of SMR schedules.
- ✓ Simple, automated scheduling of regular inspections by vehicle/driver.
- ✓ Drivers can instantly upload and send photographic evidence of damage and defects.
- ✓ Robust audit trail of inspections; an essential element of compliant fleet management (as well as the LCV-specific FORS and Van Excellence schemes.)

A simple yet completely robust way of planning, carrying out, communicating and recording vehicle safety inspections.

Designed to streamline and simplify the vehicle inspection process, the Vehicle Mobile Checksheet makes it easy to schedule, carry out, confirm and follow up all forms of inspection from daily walkarounds to formalised weekly/monthly safety checks.

Regular, audited vehicle inspections are a fundamental element of fleet management. Thanks to the technology now available to you through your mobile, you can be confident that your inspection process is robust and compliant, with minimal intervention and zero paperwork.
