

Risk assessment & e-learning

Will your drivers pass?

- ✓ Driving behaviour
- ✓ Safe driving techniques
- ✓ Eco driving
- ✓ Motorway driving
- ✓ Adverse weather driving
- ✓ Duty of care
- ✓ Driver risk
- ✓ Journey risk
- ✓ Vehicle risk
- ✓ Vehicle maintenance

Background

Safe Driving Plus is an interactive risk reduction system for fleets, designed to change behaviour and reduce accidents and injuries. Safe Driving Plus provides each individual driver with the information they need to stay safe and a personal action plan to reduce their risks.

Our assessments will allow you to take a proactive stance in addressing the needs of all your drivers, instead of reacting to incidents when it is too late.

Objectives

- ✓ Reduce your business drivers' risk of being involved in an accident by helping them to drive more safely.
- ✓ Cover your Company's Duty of Care to your employees by providing a safe and healthy working environment.
- ✓ Identify the risks to which your drivers are exposed and provide relevant and appropriate training, thereby helping your Company to improve fleet risk and associated costs.
- ✓ Help your Company with your legal risk assessment requirements and ensure you comply with the latest legislation.
